Opis produktu

Paleta zawiera 140 kolorów na które składa się:

- 117 farb monopigmentowych (wykonanych bez mieszania barw pigmentów),
- 34 kolory ziemi z których wszystkie, w odróżnieniu od produktów wielu znanych firm powstały z pigmentów uzyskanych ze zmielenia skał, a nie z syntetycznych pigmentów żelazowych,
- 9 nowoczesnych kolorów kwinakrydynowych,
- oraz kilkanaście farb rozwarstwiających się - wśród nich niespotykane gdzie indziej kompozycje: Aquarius Green, Przybysz's Grey, Ocean Blue, a także zielenie oliwne.

Wszystkie akwarele AQUARIUS charakteryzują się bardzo wysoką światłotrwałością - min. 7 w BLUE WOOL SCALE co oznacza minimum 100-letnią trwałość przy właściwej ekspozycji pracy. Etykiety na kostkach akwarel wykonane są z papieru akwarelowego pomalowanego oryginalną farbą i zawierają informacje dotyczące światłotrwałości, granulacji, transparentności oraz stopnia wnikania pigmentu w papier.

Granulacja pigmentu:

NG - nie granulujący

MG - średnio granulujący

G- granulujący
